Yes - it sounds like NASCO has a couple very interesting projects going on - the NAFTRACS project involves Lockheed.

Thanks. Our local Lockheed office seems to be a big player--influencing earmarks. Not sure what we will do.

They have different rates for different entities - the state rate is \$50,000/yr., but they offered us a much lower trial rate of \$15,000/yr. I'm not sure what other universities are paying.

Thanks. Do you remember the membership fee? They're trying to get us to join.

Yes - we joined on a two-year trial basis. Cecil Selness and Tim Henkel have been selected as our NASCO Board members.

Brad, did Mn/DOT join this group? If so, is there a Mn/DOT point person?

Bob
