I think the response looks good.....in the meantime, I think you should get some feedback from Andy Terry, who serves on the SAE standards committee and from patrol so you could be armed with a few questions when you attend the conference in Ft worth Would also be good to get some feedback from some of our trucking friends ...Ron Have?

This demonstrates some of the value of being a member of NASCO.....better to be involved early and influence decisions rather than be at the table too late.....Rick
