I have another request from Nathan Hansen concerning all documents about Mn/DOT's work with NASCO (North America's Super Corridor Coalition, Inc.) . I believe you were one of the persons who had provided data for his earlier request. We are now looking for any data you may have from March, 2007 to the current date. (You do not need to send anything you provided to me earlier, as Mr. Hansen has received all earlier data.) Would you please provide a copy of anything you have about NASCO from March, 2007 to the present time? Please include copies of any emails you have and any other materials you have in your possession. If you have manuals or brochures or other difficult to copy materials let me now- perhaps Mr. Hansen would prefer to come in an look at them rather than receive copies. Please let me know right away if you have nothing that is responsive to his request. I have an urgent need to provide the material as soon as possible. Thank you.
